

A cleaner profile. One visual language.

The new profile removes the old collection of unrelated local artwork and turns the deployed Alive GitHub Signals service into the visual system of the entire README.

01

IDENTITY

A stronger hero built around the Folded Aperture mark, the luanthnh wordmark and an editorial technical grid.

02

REAL DATA

Repository, language, activity and profile components render from the deployed GitHub API service.

03

RHYTHM

Fewer sections, larger visual fields, stronger spacing and no duplicated statistics or decorative filler.

Profile structure

- 01 / HERO + SOCIAL RAIL
- 02 / LIVE PROFILE IDENTITY
- 03 / SELECTED SYSTEMS
- 04 / RADAR + LANGUAGES
- 05 / YEAR + PULSE
- 06 / ACTIVITY + CONTACT

Products, not decorative repository pins.

Each card links to a real repository and is rendered dynamically by the deployed service. Descriptions and metrics stay current without editing the profile README.

01

ALIVE GITHUB SIGNALS

Animated SVG API for GitHub README components powered by real GitHub data.

NEXT.JS / SVG / GITHUB API

02

FRAMER GROUND

A component playground for deliberate motion studies and reusable interaction patterns.

REACT / MOTION / COMPONENTS

03

UDA TOOLS

A practical automation toolkit for repeatable desktop and university workflows.

PYTHON / SELENIUM / AUTOMATION

04

SONO MUSIC PLAYER

A cinematic browser music player focused on tactile playback states and atmosphere.

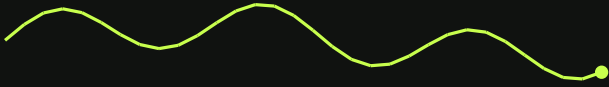

JAVASCRIPT / AUDIO / UI

Your profile becomes a client of your API.

Every data field below is referenced by URL in README.md. GitHub requests the SVG and displays current profile information; the PDF intentionally does not freeze or invent those metrics.

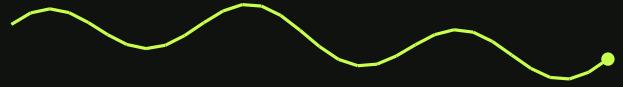

01 PROFILE

/api/profile?username=luan-thnh

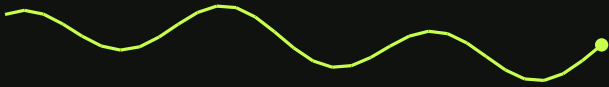

02 DEVELOPER RADAR

/api/radar?username=luan-thnh

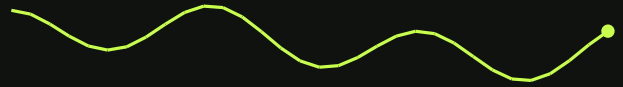

03 LANGUAGE ORBIT

/api/languages?username=luan-thnh&layout=orbit

04 YEAR IN CODE

/api/year?username=luan-thnh

05 CONTRIBUTION PULSE

/api/pulse?username=luan-thnh

06 ACTIVITY TRACE

/api/activity?username=luan-thnh
